To Control the Opener Lights

**NOTE:** Feature only available on openers equipped with a multi-function control panel.

With 315MHz Security+® remote controls, a remote push button can be programmed to operate the opener lights without opening the door.

1. **With the door closed**, press and hold the remote button that you want to control the light.
2. Press and hold the Light button on the multi-function control panel.
3. Press and hold the Lock button on the multi-function control panel.
4. After the opener lights flash, release all buttons.

Test by pressing the remote push button. The opener lights should turn on or off but the door should not move.

Open/Close/Stop Operation

**NOTE:** Feature only available on openers equipped with a multi-function control panel.

Your 315MHz Security+® remote control can be programmed to operate one door using all 3 buttons: the button with one light slot will only open the door, the button with two light slots will close the door, and the button with three light slots will stop the door’s movement. You may set up this feature as follows:

1. **With the door closed**, press and hold the remote button that you want to control the light.
2. Press and hold the Light button on the multi-function control panel.
3. Press and hold the Lock button on the multi-function control panel.
4. After the opener lights flash, release all buttons.

Test by pressing the remote push button. The opener lights should turn on or off but the door should not move.

To Add or Reprogram the Remote Control

1. Press and release the “learn” button on the motor unit. The learn indicator light will glow steadily for 30 seconds.
2. Within 30 seconds, press and hold the button on the hand-held remote.
3. Release the button when the motor unit light blinks. It has learned the code. If light bulbs are not installed, two clicks will be heard.

To Erase All Codes From Motor Unit Memory

To deactivate any unwanted remote, first erase all codes:

Press and hold the “learn” button on motor unit until the learn indicator light goes out (approximately 6 seconds). All previous codes are now erased. Reprogram each remote or keyless entry you wish to use.

---

**Proximity Disable Feature**

The remote control will turn off the proximity lighting feature if the proximity lighting is turned on 10 consecutive times without activation of a button. To re-enable the proximity lighting, simply press a button. This function conserves battery life.

---

**WARNING**

To prevent possible SERIOUS INJURY or DEATH from a moving gate or garage door:

- ALWAYS keep remote controls out of reach of children. NEVER permit children to operate or play with remote control transmitters.
- Activate gate or door ONLY when it can be seen clearly, is properly adjusted and there are no obstructions to door travel.
- ALWAYS keep gate or garage door in sight until completely closed. NEVER permit anyone to cross path of moving gate or door.

The Remote Control Batteries

**WARNING**
To prevent possible SERIOUS INJURY or DEATH:
- NEVER allow small children near batteries.
- If battery is swallowed, immediately notify doctor.

The 3V2016 lithium batteries for the opener and LED lights (marked “LED and Opener Battery”) should last 5 years. The 3V2450 lithium battery for the proximity lighting (marked “Proximity Battery”) should last 1-2 years.

**WARNING**
To reduce risk of fire, explosion or chemical burn:
- Replace ONLY with 3V2016 or 3V2450 coin batteries.
- Do NOT recharge, disassemble, heat above 212°F (100°C ) or incinerate.

To replace the batteries, remove the two screws and open the remote control housing. Push the battery out of the holder for removal. Insert replacement batteries positive side up (+). Dispose of old batteries properly.

Replace the batteries with only 3V2016 or 3V2450 coin cell batteries.

**CAUTION:** Do not bend spring contact. If bent, the proximity sensor will not work.

Troubleshooting

<table>
<thead>
<tr>
<th>PROBLEM</th>
<th>SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reduced proximity sensing (does not activate by touching top of remote control)</td>
<td>Check if proximity lighting is disabled by pressing a button.</td>
</tr>
<tr>
<td>The Proximity Sensor may be oversensitized. Sit remote control undisturbed for 60 seconds on a non-metallic surface. This allows the sensor to recalibrate itself.</td>
<td></td>
</tr>
<tr>
<td>Dim LED lights</td>
<td>Replace 3V2450 battery with same type 3V2450 coin cell.</td>
</tr>
<tr>
<td>No rapid LED blinking after pressing a button</td>
<td>Replace two 3V2016 batteries with same type 3V2016 coin cells.</td>
</tr>
</tbody>
</table>
